Protecting People and the Environment with Innovative Technology

Health & Safety Legislation

Local and international health and safety legislation (such as COSHH, NIOSH, OSHA etc) states that it is the employers responsibility to protect the health, welfare and safety of their employees. Failure to do so can result in expensive legal action, potential fines and poor employee relations

The Need for Fume Extraction

Many types of dust and fume are hazardous to health if inhaled. People can become permanently sensitised to fumes which means that continued exposure, even to very small amounts of fume, may cause asthma attacks or other respiratory diseases. A high performance fume extraction system will help to:-

- Protect employee health.
- Ensure compliance with Health & Safety regulations such as OSHA, NIOSH, COSHH, MAK, AFNOR and HSG258 or equivalent
- Increase production speeds.
- Reduce complaints by operators due to odours, dust and vapours.
- Avoid the possible cost of health compensation claims.

- Reduce the cost & time to clean laser lenses, conveyors, guarding, soldering machines and other equipment.
- Reduce product contamination.
- Provide a better working environment.
- Reduce downtime.

Which Extraction System?

There are usually two types of extraction system available:-

- External - pump contaminated air outside
- Internal - at source capture and filtration or LEV (local exhaust ventilation) system

In our opinion the best system to use is an LEV system such as a Purex. These capture fumes at the source thereby preventing fumes escaping into the workplace. They also filter hazardous particles and gasses which would otherwise be pumped into the outside environment causing pollution.

Using an internal filter system also avoids issues with environmental regulations and potential complaints from neighbouring businesses about fumes and odours.

Purex LEV systems sit next to the process and the extraction rate can be

altered precisely to suit the application. Purex machines are also easy to move if the process moves.

LEV systems have additional benefits over external exhaust systems.

See comparison table below...

“Purex LEV engineers are qualified to BOHS P601 or P602”

COMPARISON: Exhaust into the Environment System “vs” Purex LEV System...

Comparison Question	Exhausting into the Environment	Purex LEV System
How long will it take to install the system?	Several days on average.	In many cases just minutes.
Will there be any disruption in the workplace?	Scaffold, ladders etc. may be required in several places, disrupting work for lengthy periods.	Minor, if any.
Can the system be moved?	Only with scaffold etc. and disruption to work.	Yes. Simply disconnect and push to new location.
Are holes in the building required?	Yes. They need to be specially cut and sealed.	No.
Are external emissions regulations a problem?	Company must investigate and obey local laws.	Not applicable.
Is there any energy lost e.g. heating costs?	Energy (and therefore money) is wasted when heated or conditioned air is pumped outside.	No energy or heat is lost as the air is recycled. So costs are lowered.
Are there any ducting / installation costs?	Potentially expensive - as ducting needs to be purchased and specialist installation is required.	Minimal if any, depending on process.
Are there any cleaning costs?	Specialist cleaning required to prevent risk of fire or contamination. Again, scaffold, disruption & cost.	One annual service is recommended to comply with regulations such as COSHH.
Are there any decontamination costs?	Specialist decontamination may be required.	None
Can fumes be drawn back into the workplace?	Yes. Through windows or vents.	Fumes are captured by highly efficient filters
Could there be disputes with my neighbours?	Yes. Over hazardous fumes and odours.	Not applicable.

Digital Control System

*“The Ultimate in Advanced Control,
Monitoring, Performance and Safety Features”*

WATER PROOF FASCIA

GRAPHIC DISPLAY

MENU BUTTONS

ON/OFF SWITCH

A dedicated control, monitoring and display system unique to Purex fume extractors.
All functions are fully automatic, all the user has to do is set the appropriate airflow on installation.

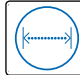

The many features of this system are designed to:

- Protect people by constantly monitoring exhaust emissions.
- Maintain a constant airflow and lower energy consumption by using variable speed motors which also allow the use of a fully automatic flow control system.
- Show the operator at a glance the status of the machine via an advanced graphic display.

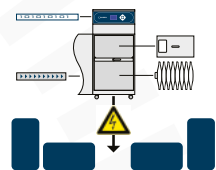

Digital Control System

Gas Sensors	Particle Sensors	Speed Control	Flow Control
<p>Constantly monitors the chemical filters to warn the user when they are nearly saturated. This helps reduce downtime by allowing the user time to make replacement filters ready. Gas sensors also warn the user if hazardous gas is passing through the system, e.g. due to a missing, damaged or incorrectly fitted filter.</p> 	<p>Constantly monitors the particle filters to warn the user if hazardous particles are passing through the system, e.g. due to a missing, damaged or incorrectly fitted filter.</p> 	<p>The user can set the required airflow for the process. The motor will automatically speed up or slow down until the “actual” airflow equals the “required” airflow. This system is energy efficient as the motor does not have to constantly run at 100%. It also means the machine is quieter and the filters last longer.</p> 	<p>Purex “Flow Control” automatically increases the speed of the motor as the filter blocks to keep extraction constant and ensure fumes are captured effectively throughout the life of the filter.</p> 
Filter Status	Filter Indicator	Temperature	Interface
<p>Constantly monitors the particle filters to warn the user when they are nearly full. This helps reduce downtime by allowing the user time to make replacement filters ready.</p> 	<p>If a filter is nearly blocked or if the gas or particle alarms are triggered, this icon will show which filters may need attention. This makes it easier and quicker for the user to identify where the problem may be. This icon also indicates to the user when the motor is running.</p> 	<p>An adjustable alarm to warn if the filtered air temperature goes above a certain level.</p> 	<p>Allows the Purex unit to communicate with associated equipment such as lasers or reflow ovens etc. Options:</p> <ul style="list-style-type: none"> • Synchronised STOP/START • Automatic run on (extraction continues for a set period after associated equipment is stopped.) • Filter Alarm Signals • Several connection types • Remote ON/OFF switch 

Accessories: (See separate Brochure)

Additional Filtration	Arms & Pipework	Remote ON/OFF
<p>Some applications may require additional filter capacity, for example the Cascade filter can extend the life of other filters in problematic applications.</p> 	<p>Accessories include arm, tip and pipework kits.</p> 	<p>Switch your Purex fume extractor on/off from up to 5m away. This is particularly useful if your fume extractor is tucked away under a bench where it cannot easily be accessed.</p> 

Services Provided

Installation	LEV Testing
<p>Correct installation is essential to aid compliance with health and safety regulations and to protect your people and process.</p> 	<p>LEV testing is also essential to aid compliance with health and safety regulations and to protect your people and process.</p> 

Contact Purex on 01405 746045 or email lev@purex.co.uk

SOLDERING & ELECTRONICS MANUFACTURING

Machine	Arm Extraction, Cabinets & Cowl						Tip Extraction	Reflow	Wave
	Max No. Arms 38mm	Max No. Arms 50mm	Max No. Arms 75mm	Max No. Arms 100mm	Max No. Cleancabs	Max No. Cowl	Max No. Soldering Iron Tips	Oven Extract Volume Required m³/hr	Oven Extract Volume Required m³/hr
200	3	2	-	-	1	2	up to 30	-	-
400	6	4	1	1	1-2	4	-	-	-
200i	3	2	-	-	1	2	up to 30	-	-
200i-HP	-	-	-	-	-	-	up to 50	-	-
400i	6	4	1	1	1-2	4	-	-	-
650	-	-	2	-	-	-	-	-	-
800i	9	8	4	2	2-4	6	-	-	-
1500i	12	12	-	5	4-8	8	-	Below 900	-
2000i	15	15	-	5	6-12	10	-	Below 1500	Below 1500
5000i	36	36	-	10	12-24	20	-	Over 1500	Over 1500

Notes:

- The selection is based on the use of a standard connection kit.
- A larger extraction machine may be required depending on the layout and the type of fume or dust.
- Continuous use may require a machine with larger filtration capacity.
- In some cases more arms/cowls can be used e.g. for non coalescing vapours such as solvents or where airflow valves can be opened and closed.

IMPORTANT: Choose a vacuum control machine for Arm and Tip extraction and a volume control machine for other applications.

LASER ENGRAVING

Size of Laser Engraving Machine		400i	800i 2 tier	800i 3 tier	1500i	1750i	2000i	5000i
Light Use	Heavy Use*							
Small		●	-	▲	-	-	-	-
	Small	●	-	▲	-	-	-	-
Medium		●	■	▲	-	-	-	-
	Medium	x	●	▲	■	-	-	-
Large		x	x	x	●	▲	■	-
	Large	x	x	x	-	x	●	■
Extra large open bed lasers		x	x	x	x	x	●	■

Approximate laser bed sizes:

Small - 16"x12", Medium - 24"x12", Large - Anything over this.

- Normal selection.
- Select if extra filter capacity is required and/or additional airflow is required to extract from multiple lasers or heavy duty applications.
- (-) May also be considered.
- x Unit not usually specified for application.
- ▲ Consider if continually lasing acrylic.

Notes: Always select a volume control machine.

- The selection is based on the use of standard connection kit.
- * Heavy use includes high proportion of cutting, lasers with a deep bed and constant use. Contact Purex for further advice.
- In applications with extremely high dust emissions, a Cascade inline filter can be considered.

CODING & MARKING

Laser Coding & Marking

CPM (Codes per Minute)		200i	400i	800i 2 tier (High Dust)	800i 3 tier (High Gas)	1500i	1750i (High Gas)	2000i	5000i
Good Enclosure	Poor Enclosure								
<200		●	■	-	-	-	-	-	-
	<200	x	●	■	-	-	-	-	-
200-500		x	●	■	-	-	-	-	-
	200-500	x	x	●	■	-	-	-	-
>500		x	x	●	■	-	-	-	-
	>500	x	x	x	x	●	■	■	-
Machines for Lasing PVC		x	▲	x	▲	x	▲	x	▲

- Normal selection.
- Select if extra filter capacity is required and/or additional airflow is required to extract from multiple lasers or heavy duty applications.
- (-) May also be considered.
- x Unit not usually specified for application.
- ▲ Optional "PVC" machines should be used when lasing onto PVC

Notes: Always select a volume control machine.

- The selection is based on the use of standard connection kit.
- The 800i 3 tier unit is designed for use where the application has low dust, but high gas emissions. The 2 tier is designed for applications producing high dust emissions.
- A poor enclosure is where less than 4 sides of the process are enclosed.

Continuous Inkjet Coding & Marking

Small Character Inkjet Printers	200	400	800
See Notes	●	■	■

- Normal selection.
- Select if additional airflow is required to extract from multiple inkjet heads or if the controller unit has cooling fans installed.

Notes: Always select a volume control machine.

There are many different makes and models of inkjet printers available. Please contact Purex or your local representative for advice on which model is correct for particular applications.

IMPORTANT:

- This is a guide only, many factors influence the choice of fume extraction system. For more help and information please contact Purex or your local representative
- Purex recommends the use of anti static hose with continuous inkjet printers.

DISPENSING AND CONFORMAL COATING

Process Time	Model		
	800 WHITE	800 STAINLESS	800i 3 Tier
8 Hours	●	●	-
24 Hours	x	x	●

- Normal selection.
- (-) May also be considered.
- x Unit not usually specified for application.

THE ULTIMATE IN FLEXIBILITY - 650

- The fully mobile unit with integrated arms gives you the "Ultimate in Flexibility" around the workplace.
- With a large selection of filters the 650 can be applied on many processes including soldering, adhesives, chemicals and more.

DYE SUBLIMATION

- Includes special filter box which allows excess fluid to be drained from the process, giving longer filter life.

If your process creates a hazard contact Purex. We have a solution.

200 & 400

Cabinet weight			50 Kg	50 Kg
Sound Rating (dBA)			52	55
Airflow m³/hr			150	467
Vacuum (kPa)			17.29	9.10

4

Pre-filter Pad

Pack of four supplied - See page 19-20

5

Main Filter

One supplied - See page 21-22 for your application

6

Connection Hose Kit

One supplied - See page 23-25 to suit your system

7

Power Cable

One supplied - See page 26 for your country & voltage

8

Machine Interfacing (Optional)

Allows the Purex system to interface with a piece of equipment connected to it.

See page 27-29 to match your system

Optional Clean Air Cowl - I90040

Air Compressor Available For This Model

Legend:

- 1) Air inlet - 80mm safe seal.
- 2) Pre-filter.
- 3) Main Filter (HEPA location). †
- 4) Main Filter (Carbon location). †
- 5) Clean air returned to workplace.
- 6) Filter locking handle.
- 7) Filter identification label.
- 8) Debris tray.

All machines are mounted on four castors for increased mobility.

† Standard Filter Only

Digital Control System

A dedicated control, monitoring and display system unique to Purex fume extractors. All functions are fully automatic, all the user has to do is set the appropriate airflow on installation. The features of this system are designed to:

- Lower energy consumption by using variable speed motors and automatic flow control.
- Increase filter life by using the optimal extraction rate.
- Further protect people by constantly monitoring exhaust emissions.
- Interface with other equipment e.g. a laser.
- Maintain a constant extraction rate to prevent fume escape or damage to equipment.

System Features...

- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Adjustable airflow
- Clear and informative graphic display
- Gas and particle sensors on the exhaust
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel
- High performance brushless motors

Includes:

- 1 x Main filter
- 4 x Pre-filter pads
- 1 x Connection kit
- 1 x Power cable

Accessories

Please see the accessories brochure.

Allows the Purex system to interface with a piece of equipment connected to it.

See page 27-29 to match your system

The 650 is supplied with one 75mm multi-position arm attached directly to the rear of the machine.

A second arm is optional.

Legend:

- 1) Rear air inlet - 75mm x 2 to connect extraction arm/s
- 2) Pre-filter.
- 3) Main Filter (HEPA location). †
- 4) Main Filter (Carbon location). †
- 5) Clean air returned to workplace.
- 6) Filter locking handle.
- 7) Filter identification label.

All machines are mounted on four castors for increased mobility.

† Standard Filter Only

Digital Control System

A dedicated control, monitoring and display system unique to Purex fume extractors. All functions are fully automatic, all the user has to do is set the appropriate airflow on installation. The features of this system are designed to:

- Lower energy consumption by using variable speed motors and automatic flow control.
- Increase filter life by using the optimal extraction rate.
- Further protect people by constantly monitoring exhaust emissions.
- Interface with other equipment e.g. a laser.
- Maintain a constant extraction rate to prevent fume escape or damage to equipment.

System Features...

- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Adjustable airflow
- Clear and informative graphic display
- Gas and particle sensors on the exhaust
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel
- High performance brushless motors

Includes:

- 1 x Main filter
- 4 x Pre-filter pads
- 1 x Arm & hood
- 1 x Power cable

- Quick change patented Labyrinth pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate and precision made from stainless steel
- High performance brushless motors

Includes:

2 x Main filters and
1 x Labyrinth Pre-filter
or 4 x Pre-filter pads with
1 x Pleated Bag Filter
1 x Power cable (no plug)

Accessories

Please see the accessories brochure.

Pre-filters are designed to capture larger particles before they can enter the main HEPA filter.

Without pre-filters, the life of the main filter would be much shorter.

A variety of media and designs are available to allow Purex extractors to be used in a wide range of processes.

A

Pads

Pad pre-filter

- Extends the life of the main filter by capturing larger particles before they reach the HEPA filter
- Fits neatly under the main filter
- Graduated fibre matrix delivers excellent particle capture capacity
- Ideal for low volume applications or where small amounts of particles are produced
- Captures particles to 5 micron at efficiency of 40 - 60%

B

Pleated Bag

Pleated bag pre-filter

- Extends the life of the main filters by capturing larger particles
- Provides additional particle capturing capacity
- Ideal for processes where large amounts of particles are produced
- Contains the particles inside for clean and simple disposal
- Standard captures particles to 5 micron at 40 - 60%
- Composite captures particles to 1 micron at 95% efficiency

C

Labyrinth

Patented Labyrinth pre-filters

- Extends the life of the main filter by capturing larger particles before they reach the HEPA filter
- Fits neatly under the main filter in integral Purex extractors
- Graduated fibre matrix delivers excellent particle capture capacity - up to 20 times more than a standard filter
- Ideal for medium-high volume applications
- Contains the particles inside for clean and simple disposal
- Composite material available for extra filter life and filtration down to 0.5 micron
- Standard captures particles to 3 micron at efficiency of 60 to 80%
- Composite captures particles to 1 micron at efficiency of 80 - 95%

FEATURES

- VariColour filter blocked warning system
- Highest grade HEPA and carbon technology
- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Quiet in operation
- Simple to install and easy to relocate

If uncertain of Pre-filter choice contact Purex or your representative.

Key

- 4 pack of pads
- Single bag
- 2 pack of bags
- Pleated bag in metal case. Fit this when applicable instead of main filter.

Purex use specialised combinations of filter media to capture particles, gases and vapours generated by industrial processes such as laser engraving, laser marking, hand and machine soldering, ink jet printing and many others. Each filter has a unique serial number and is individually tested and certified to ensure performance and safety.

Purex HEPA (High Efficiency Particulate Air) filter elements are precision manufactured from a pleated material that incorporates reinforcing strips which separate the pleats and help prevent airflow vibration or collapse.

Additionally, air equalisation plates are used between the layers of media to further reinforce the filter housing and to distribute the airflow across the filter to ensure all of the filter media is used.

Typical Filter

HEPA/Chemical

Filters small particles @ 99.997% down to 0.3 microns in size and adsorbs a wide variety of gases and vapours

Chemical

Adsorbs a wide variety of gases and vapours.

If you do not see a connection kit that fits your machine or pipework, contact Purex or your representative.

200, 400, 200i, 200iHP, 400i, 400iPVC, 400i Dye Sublimation, 650

Are supplied with a 5m long detachable cable with a choice of plug.

USA/ASIA 120V	USA/ASIA 230V	UK 230V	Europe 230V
			
Code: 410160	Code: 410161	Code: 410162	Code: 410163
Australia	No Plug		
			
Code: 410164	Bare wire only Code: 410165		

15m long cable for all the above models

800, 800i, 1500i, 1750i, 2000i, 5000i

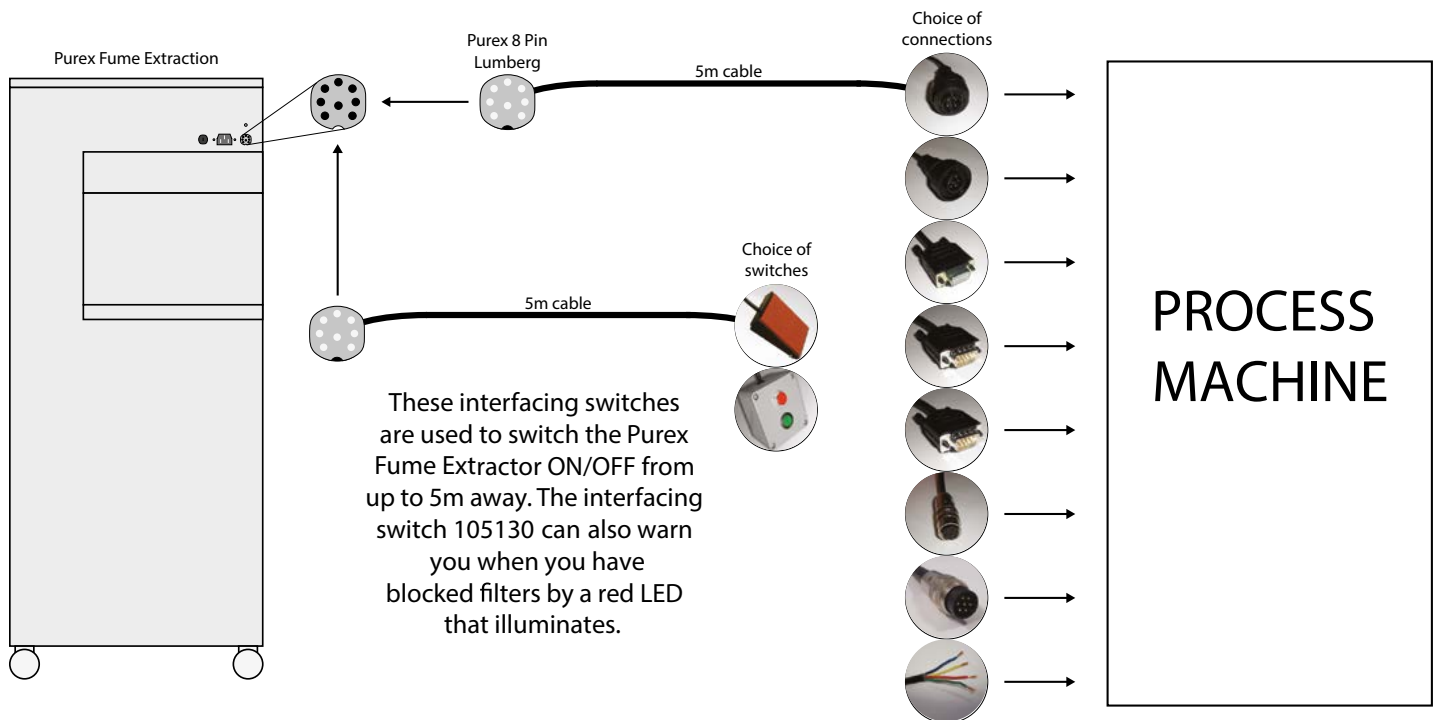

Are factory fitted with a 5m long cable without a plug.

Best practice is to wire these models into a fused spur.

Electrical installations should only be carried out by a qualified person.

Interface Cables

Machine interfacing has two elements - Remote Start & Filter Relay Condition.

Remote Start allows the Purex extractor to be controlled by the process machine, such as a laser or reflow oven.

The Filter Relay Condition warns the operator if the Purex extractor starts alarming.

A separate interface guide is available for greater detail

9 way D-type

ALARM

PINS 1 & 2 = VOLT FREE ALARM OUTPUT CONTACTS

REMOTE START

VOLT FREE CONTACTS REQUIRED FROM THE PROCESS MACHINE TO OPERATE
PIN 3 = REMOTE START INPUT SIGNAL

PIN 4 = +12V DC

PINS 5,6,7,8 & 9 = NOT USED

Code: 105104 (5m cable)

6 way Lumberg

ALARM

PINS 1 & 6 = VOLT FREE ALARM OUTPUT CONTACTS

PINS 3 & 4 = VOLT FREE ALARM OUTPUT CONTACTS

REMOTE START

VOLTAGE SIGNAL REQUIRED FROM THE PROCESS MACHINE TO OPERATE

PIN 5 = +9V DC / +24V DC REMOTE START INPUT SIGNAL

PIN 2 = 0V DC

Code: 105096 (5m cable)

7 way Lumberg

ALARM

PINS 3 & 4 = VOLT FREE ALARM OUTPUT CONTACTS

REMOTE START

VOLTAGE SIGNAL REQUIRED FROM THE PROCESS MACHINE TO OPERATE

PIN 1 = +9V DC / +24V DC REMOTE START INPUT SIGNAL

PIN 2 = 0V DC INPUT

PINS 5,6 & 7 = NOT USED

Code: 105098 (5m cable)

No Connector

ALARM

RED & BLUE WIRES = ALARM SIGNAL

OUTPUT VIA A SET OF VOLT FREE CONTACTS INSIDE PUREX EXTRACTOR

REMOTE START

YELLOW & GREEN WIRES = REMOTE START/STOP

VOLT FREE CONTACTS REQUIRED FROM THE PROCESS MACHINE TO CLOSE THESE WIRES TO START (+12V DC)

Code: 105108 (5m cable)
Code: 105108L (10m cable)

Remote ON/OFF Switch

Now you can easily switch your Purex fume extractor on or off from up to 5m away.

This is particularly useful if your fume extractor is tucked away under a bench or in a cupboard where it cannot easily be accessed.

This feature is also useful if the work you do is not continuous e.g intermittent hand soldering, as you will be saving energy by turning the extractor off.

Code: 105114 (5m cable)

A separate interface guide is available for greater detail

4 way Mini Bulgin

ALARM

PINS 1 & 2 = VOLT FREE ALARM
OUTPUT CONTACTS

REMOTE START

VOLT FREE CONTACTS
REQUIRED FROM THE PROCESS
MACHINE TO OPERATE

PIN 3 = REMOTE START INPUT SIGNAL

PIN 4 = +12V DC

Code: 105097 (5m cable)

Illuminating Alarm Switch

The Illuminating alarm switch not only allows you to remotely switch on/off the Purex fume extractor, but also warns the operator that the filters are blocked and the machine is alarming using a red LED that illuminates to signal the warning.

It uses the Purex extractors opto-isolated 12V DC to provide the remote start and the alarm signal.

Code: 105130 (5m cable)

6 way Bulgin

ALARM

PINS 1 & 4 = VOLT FREE ALARM
OUTPUT CONTACTS

REMOTE START

VOLTAGE SIGNAL REQUIRED
FROM THE PROCESS MACHINE
TO OPERATE

PIN 3 = +9V DC / +24VDC REMOTE
START INPUT SIGNAL

PIN 5 = 0V DC
